

Draft Prioritization Framework									
Task Area(s)	Description	Strategy Type	Scale	Multi-Criteria Assessment	Guiding Principles (JT)	Equity Assessment*	Key Partners for Implementation	Impact**	Feasibility [‡]
Adaptation/Resilience				see draft assessment matrix	(include drop-down menu for the GPs JT develops)			High	Medium

*description of both positive and negative impacts and opportunities to elevate the former and mitigate the latter
 **impact - need to co-create a definition for impact (efficacy of strategy implementation, considers certainty based on science/practitioner success)
 ‡feasibility refers to ability to implement (must consider technical, monitoring, applicability)

Lingering considerations to incorporate
 consideration for max sequestration/storage opportunity
[use IPCC's 6 feasibility criteria](#)

FAQ4.1: The different feasibility dimensions towards limiting warming to 1.5°C
 Assessing the feasibility of different adaptation and mitigation options/actions requires consideration across six dimensions.
