- Presentation of the following proposed rules:
  1. Environmental Citations, Agency of Natural Resources, Department of Environmental Conservation
    - a. This rule amendment simplifies the penalty amounts for which a person may be issued a civil citation in association with their violation of Agency of Natural Resources laws and permits, establishing a consistent amount to be applied across Agency programs. The rule amendment also creates a distinction between the penalty amount that applies to non-responsive recipients of civil violations and those that apply to responsive recipients. In addition, the rule provides that where a recipient of a citation fails to conduct recordkeeping or reporting, there shall be a rebuttable presumption that such recipient failed to conduct the activity which was to be recorded and/or reported. The rule amendment also includes miscellaneous housekeeping edits.
  2. Lead Poisoned Children Rules, Agency of Human Services, Department of Health
    - a. This rulemaking repeals the Lead Poisoned Children Rules. Act 149 (2018) modernized the lead poisoning prevention statute. The components required by 18 V.S.A. § 1757 are in the Blood Lead Screening, Reporting and Response Rule that is going through rulemaking concurrently.
  3. Blood Lead Screening, Reporting and Response Rule, Agency of Human Services, Department of Health
    - a. This rulemaking modernizes and clarifies the blood lead testing and reporting requirements rule. Additionally, this rulemaking lowers the blood lead level at which parents and guardians receive educational material from 5 micrograms per deciliter to anything greater than zero.
