 2. Mega Millions Rules, Vermont Lottery Commission
 - a. These rule changes affect the matrix of the Mega Millions Game, the odds of winning a prize, and the cost of a Play. The matrix of the game changes from a player choosing 5 (five) out of 75 (seventy-five) numbers, plus 1 (one) out of 15 (fifteen) numbers, to 5 (five) out of 70 (seventy) numbers, and 1 (one) out of 25 (twenty-five) numbers. The odds for winning the second prize level of \$1 million are substantially improved, as well as higher starting jackpots. The prize per play will increase from \$1 (one) per play, to \$2 (two) dollars per play.
 3. Municipal Pollution Control Priority System, Agency Natural Resources
 - a. This rulemaking is an update to the Municipal Pollution Control Priority System Rule, which ranks water pollution abatement and control projects (e.g. wastewater facility upgrades and storm water remediation projects) for purposes of awarding federal and state funding, both loans and grants. The Rule includes new criteria and updated processes for ranking projects, pursuant to Act 103 (2016). The Rule also includes the process to determine the amount of grant funding a project may be eligible for. Additionally, the Rule updates the Subchapter requiring certain projects to demonstrate they will not result in scattered development to focus on project types that are the most likely to cause such issues; updates administrative processes, including public notice requirements; updates definitions consistent with state statute and other rules; clarifies language; and updates formatting, style, and grammar consistent with Department drafting conventions.
