

# Organizational Safety Institute

*Celebrating 10 years of educating organizations about safety and risk*

For 10 years, PMA's Organizational Safety Institute (OSI) has been hosting educational events and sharing best practices with you through our risk control subject matter experts. OSI is a place where you can learn "virtually" about some of the emerging best practices in leading safety efforts that reduce the total cost of risk for your organization. We welcome any feedback you have to make our programs even better! Send an email to us at [heretohelp@pmagroup.com](mailto:heretohelp@pmagroup.com). To register for an upcoming session(s), click on the title/link below or visit <http://websource.pmagroup.com>.

## Schedule of Online Learning Events

**September 6, 2018 – 10:30 AM – 11:30 AM (EST)**

**Office Ergonomics: The Essentials for Reducing Injury Risk with Workstation Set-Up**

**Session Leader: Bill Pudlewski, Risk Control Specialist – Ergonomics Team Leader**

Many organizations routinely face claims and employee requests from one of the most common workplace activities; sitting and/or standing at computer workstations. This session is designed to help you simply understand the keys to evaluating office workstations and the process for evaluating specific situations. In this session, you will also learn to use PMA provided assessment tools to accomplish this objective in your organization. Great session for learning how to conduct these assessments in your workplace; even via distance using data collection resources provided.

**September 20, 2018 – 2:00 PM – 3:15 PM (EST)**

**Workplace Violence Prevention: Awareness Keys**

**Session Leader: Marc Strauss, Sr. Risk Control Consultant**

In this session, we will examine key risk management considerations organizations should evaluate as they seek to improve their workplace violence prevention efforts. For many organizations, getting started is one of the first challenges – and this session is ideal for this purpose. If your organization is a little further down the road developing controls in this area, the key considerations, resources and discussions that will be primary to this event may still serve as a help in your organization's continuous improvement efforts. This session leader has a law enforcement background and regularly speaks on this topic.
